

Regulatory Updates:

- Grandvue remains COVID-free at this time.
- Although we are looking for dedicated individuals to join our Grandvue family, our staffing levels remain high.
- We have a current Personal Protective Equipment (PPE) supply that is adequate for our dedicated COVID-19 unit if the virus reaches our facility.
- We are developing a mass instant communication system. This will allow us to contact Resident Representatives for weekly updates on our COVID status, staffing level and PPE supply. We will be sending out emails and texts soon to test the new system.

Facility Updates:

- With the warmer weather comes the desire to get outdoors, and we will soon be allowing Residents to use the new Terrace and Recreation Park. As a part of Grandvue, the Terrace and Recreation Park is closed to visitors at this time to help us maintain social distancing and reduce the risk of exposure. This includes the parking lot and area surrounding the park; please do not attempt to visit with Residents "over the fence," or we will have to close the park to all users.
- Please help us maintain our chain of safety and refrain from bringing perishable and non-perishable food in for Residents and staff. It is difficult for us to track expiration dates and infection control practices when foods are kept in Residents' rooms and shared with their neighbors and care partners.
