

## Masks

There is a lot of information in the media regarding the use of face masks. Here at Grandvue, we will continue to rely on evidence-based practices and current CDC guidance, but remain flexible to implement any changes to the CDC's guidance as it develops. We are in constant communication with leaders from multiple facilities and each is addressing their risk on a case by case basis. We will continue to work with the local, regional and state health departments, MIDHHS, CDC guidance and medical director to best protect our Residents and staff.
